(54) Title: NOVEL PHARMACEUTICAL DOSAGE FORMS AND METHOD FOR PRODUCING SAME

(57) Abstract: Pharmaceutical dosage forms are produced by injection molding a mixture of an active agent and a polymer under pressure, in the presence of a gas or supercritical fluid. Rapid release of the pressure causes the mixture to form a microcellular or supermicrocellular solid. The release of pressure takes place in the mold. The process is especially useful for producing durable flash-dissolve and gastro-retentive tablets.

3. ☒ Claim Nos.: 20  
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

## Box II Observations where unity of invention is lacking (Continuation of Item 2 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

1. ☐ As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.
2. ☐ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
